

A modern interior hallway with wood-grain wall panels and a reception desk. The hallway is long and narrow, with a light-colored tiled floor. The walls are covered in vertical wood-grain panels. On the right side, there are several rectangular panels of varying sizes, some of which are illuminated from within. At the end of the hallway, there is a reception desk with a computer monitor and a small plant. The ceiling is white with recessed lighting. The overall atmosphere is clean, modern, and professional.

Indoor —

Better Life Starts From Here...

Preface

Earth provides us with everything
Mountains rivers lakes seas and a sparkling night sky
In return
Humanity seems to offer only unending exploitation

But ice will melt
Water will dry up
Forests will disappear
And then where will we stand?

Through love
All things thrive and grow
And life becomes a joyous current
Nurturing boundless possibilities

Our task is to embrace and connect with all living beings
To receive love and give love in return.

Let birds dwell in the forests
Fish swim in the waters
Climb mountains and behold the seas
Appreciate her beauty
And protect her

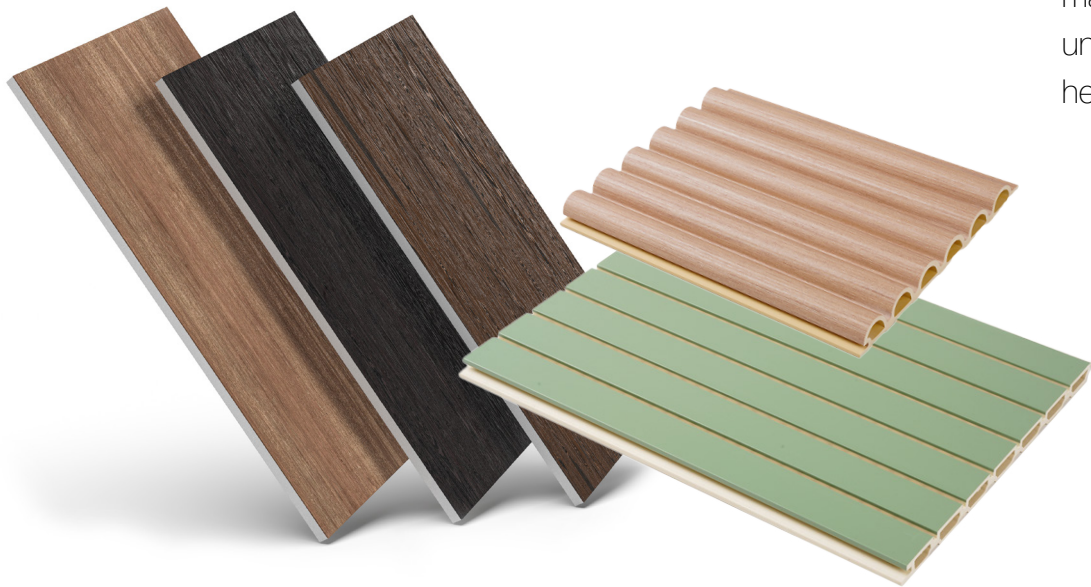

With our strength
Let us support the Earth's eternal vitality
Creating an ecological balance where humans and nature harmoniously coexist

Legno *Deco*

Legno Deco is extruded from wood fiber, resin and a small amount of polymer materials. Its surface looks like solid wood, in the meantime, it has the characteristics of waterproof, moth proof, anti-corrosion, heat insulation and sound insulation. It is suitable for all kinds of indoor decoration scenes, without deterioration, mildew, cracking and embrittlement.

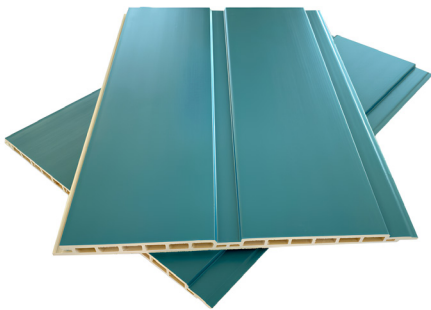

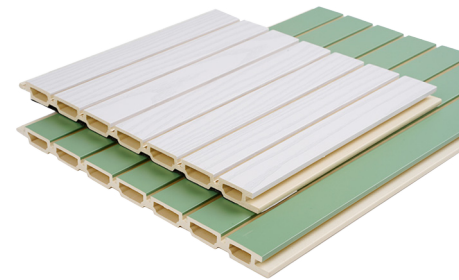

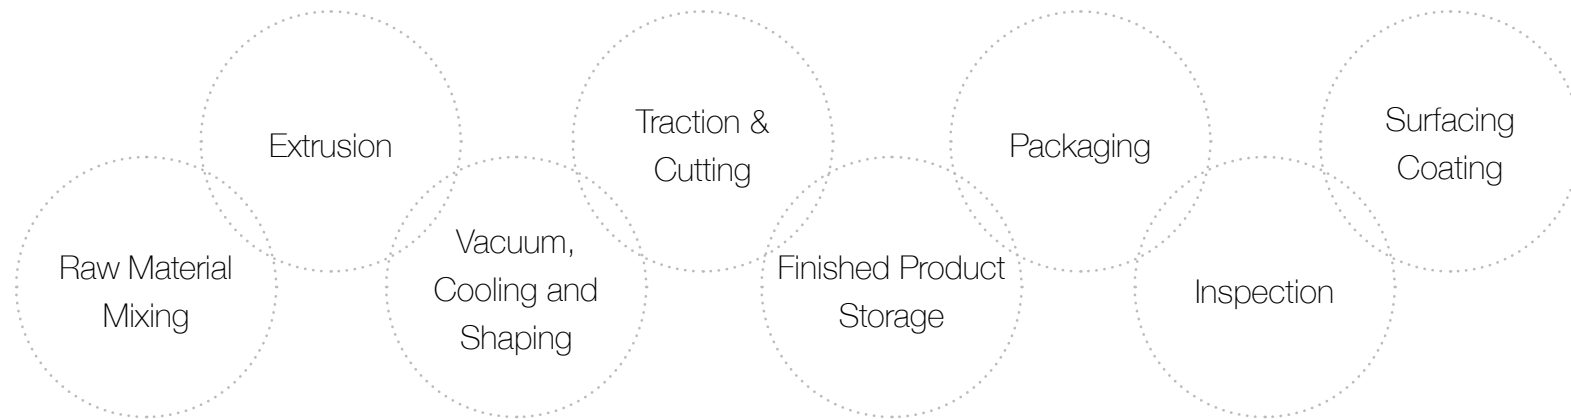

The color, size, and shape of our WPC material can be customized according to the requirement of our customers. In addition, it can be nailed, drilled, sharpened, sawed, planed, and painted like real wood, and it's resistant to deformation and cracking.

WPC material has also been an element of sustainable development in this new era. Wood fiber and resin can be recycled and reused, which makes WPC material among the best alternatives for real wood. The unique technology and production procedure that we adopt is able to help reduce the waste of raw material to zero.

Why *Legno Deco*

Legno Deco is a type of eco-friendly material called Wood-Plastic Composite that is made of wood powder, PVC, and other reinforcing additives. Its widely used for interior decoration, suitable for various environmental settings. While possessing the visual features of real wood, it carries more preferable physical characteristics.

Waterproof

Impact Resistance

Low Maintenance

Long life

Environmentally Friendly

Mold Resistance

Termite Resistance

Weather Adaptability

Scratch Resistance

Why *Legno Deco*

Environmentally friendly

Moth-proof and durable

Completely waterproof

It's 100% recyclable

Mold-proof

Free of maintenance

Flame-retardant

Easy to install

Adaptable to different environmental conditions

Why *Legno Deco*

LEGNO DECO CHARACTERISTICS

CHARACTERISTICS OF PLASTIC	CHARACTERISTICS OF WOOD	AND MORE.....
Water Proof	Easy to Cut, Fix, and Glue	100% Recyclable
No Crack, No Split, No Warp, No Splinter	Easy to Tenon, Drill, and Nail	No Need to Paint Periodically
High Dimension Stability	Natural Feeling	Requiring Less Maintenance
Insect Resistance	-	Environmentally Friendly
Manufacture Feasibility of Various Profiles	Innocuous	Various Color Options

.....

Legno Deco, have a variety of characteristics including rich patterns, multiple artistic style modeling, and strong layering. It's designed to improve the general effect of interior decoration and create an environmental ambiance full of the charm of real wood.

The image shows a modern interior space, likely a hallway or a living area, featuring a combination of wood plastic composite (WPC) and other materials. On the left, a long, low white console with a marble top and integrated lighting runs along a wall. A large, square, textured brown artwork is mounted on the wall. A curved white ceiling with recessed lighting arches over the space. In the center, a large window offers a view of a city skyline. To the right, a tall, white, vertically-ribbed partition separates the space from a living area with a sofa, a coffee table, and a green armchair. A dark shelving unit with books and decorative objects is visible on the far right.

Customization

With the effort of our R&D team, we now have two surface treatments and over a hundred color options available for our WPC material. From light and dark series to wood grain and marble series, we make sure that customers can get the one that suits their decorative style.

Customization service is available at any time. Feel free to contact us if you have any customization plans about the surface treatment.

Standard Surface and Coating Surface

Standard Surface

It's mainly composed of wood fiber, high polymer material, and environmentally-friendly color developing agent. It can be used directly without painting on the surface. The colors are mainly divided into light and dark color series, looking plain and natural, very much like real wood.

PVC Protective Film

Base Panel

Based on the standard surface, it's covered with PVC protective film with special treatment. It's resistant to fade and abrasion, easy to clean, with rich patterns and various styles. The coated surface series includes more than 100 types of well-designed surface textures for which EVOKEWPC designers have put a lot of effort into the research on the aesthetic disparities between different countries and regions.

Customized Manufacturing

The birth of new products comes from creative thinking, drawing, 3D modeling, and go through repeated modifications with the actual situation, to achieve practicality and beauty, so as to satisfy customer's needs.
